

ORIENTAL MOTOR OVR4048K5-V 4 AXIS ARTICULATED ROBOT

Compact automation solution

OVR4048K5-V
OVR Series Articulated 4-Axis Robot

- 4-axis articulated configuration
- Maximum horizontal reach: 480 mm
- Maximum vertical reach: 570 mm
- Transportable mass: 5 kg
- Repeatability: ± 0.05 mm

PRODUCT DESCRIPTION

Oriental Motor OVR4048K5-V 4-Axis Articulated Robot

A compact 4-axis articulated robot designed to automate handling, assembly and positioning tasks in manufacturing and industrial environments. Its articulated design enables flexible movement within confined workspaces, helping improve productivity, repeatability and process consistency.

Key Features

- 4-axis articulated robot for flexible automation tasks
- Suitable for pick-and-place, assembly and material handling applications
- Compact design for integration into space-constrained machinery and work cells
- Supports improved repeatability and production efficiency
- Designed for straightforward integration into automated systems
