

## TAKEX - SSCT CROSS RAY PHOTOELECTRIC SENSOR

SSCT805-PNP  
WIDE SENSOR 100-500MM H=50MM

- Detection - "width" 50, 100 and 150 mm
- Curtain enclosure is built only on a depth of 14.5 mm
- Perfect for detecting wooden lipping, etc.
- IP67

### PRODUCT DESCRIPTION

### TECHNICAL DATA

|                             |                   |
|-----------------------------|-------------------|
| Approvals                   | CE                |
| Detection height            | 50 mm             |
| Distance max                | 500 mm            |
| Distance min                | 100 mm            |
| Electrical connection       | Casting cable 3 m |
| Function                    | light on          |
| IP class                    | IP67              |
| Lens material               | Plastic           |
| Light type                  | IR LED            |
| Light/dark switching        | No                |
| Material of body            | Aluminium         |
| Number of bulbs             | 5                 |
| Output                      | PNP               |
| Output current max          | 0,1 A             |
| Photocell technology        | Curtain photocell |
| Power consumption max       | 0,08 A            |
| Reaction time               | 8 ms              |
| Temperature operational max | 55 °C             |
| Temperature operational min | -25 °C            |

|                |      |
|----------------|------|
| Voltage dc max | 24 V |
| Voltage dc min | 12 V |
