

THK - HSR RAIL AND BLOCKS

HSR 15A

- Same carrying capacity in all 4 axis.
- Global standard
- Rail cut to customer specific length
- Available with corrosion resistant coating.

PRODUCT DESCRIPTION

A global standard ball bearing contact between rail and block, where each bearing channel is positioned at a 45 ° contact angle so that the nominal loads are uniformly aligned in four directions (radial, reverse radial and lateral).

We can supply as blocks and rail separately. Rail can be cut to customer specific lengths.

TECHNICAL DATA

Dynamic load	10,9 kN
Height	24 mm
Length	56,6 mm
Static load	15,7 kN
Width	47 mm
