Flexy Extension Card - 4G Verizon Modem

This Flexy extension card increase the connectivity capability of the Ewon Flexy with a LTE (4G) modem for Verizon provider.

Many field-based applications do not have access to a wired Internet connection, instead requiring cellular connectivity. Using a 4G cellular connection provides the advantages of innovation and cutting edge technology and can sometimes be the only cellular connectivity in a remote area. The 4G LTE Flexy extension card addresses these requests while allowing an Ewon Flexy to connect to the Internet. For remote access requirements, a simple SIM card with data plan is all that is needed to connect to the Talk2M cloud-based solution. Similarly for SCADA-like applications, secure remote VPN connectivity can also benefit from this simple SIM card without the burden of provisioning a fixed IP address on the remote site.

It is compatible with the Ewon Flexy 10x series, 20x series and 205.

Technical Characteristics

Frequencies	Verizon certified 4G:B4(AWS1700), B13(700) MHz
-------------	---

Antenna Connector	SMA-F Female
Antenna	Not included
Operating temperature	-25 °C to +60°C
Marking	cURus, FCC.

Certifications

FCC/IC	This product complies with the Part 15 of the FCC rules
Carrier approval	Verizon
Safety	The product fulfils the requirements of: EN 62368-1:2014 + A11:2017 UL 62368-1 Second Edition CAN/CSA C22.2 No. 62368-1-14 Second Edition EN 60950-1:2006 + A1:2010 +A11:2009 + A12:2011 + A2:2013

Ordering Information

ORDER CODE: FLB3203_00

MODEL NUMBER : 02201

WARRANTY: 3 years
